ABSTRACT

One of the biggest apocalyptic cries in the global economy today is the loss or obsolescence of existing jobs due to automation and rapid changes in technology.

India's unemployment rate for those who are 20 years of age or older and live in urban areas dropped from 9.8% to 7.2%, indicating a sustained recovery from the coronavirus pandemic that had left millions of people without jobs.

Engineering is one of the most popular professions and career options among the youth in India. As a matter of fact more than 15 lakh students get graduated as engineers in India every year which is largest in the world but the twist and sad thing in the story is that more than 80% of the engineers do not get any employment due to lack of technical skills and only 3% of engineers get good quality job related to the sector.

As a solution Our New JOB4U website is here! Making it Easier than Ever to Stay In Touch with important and genuine Information that you Need to be Successful

Now you can quickly find jobs and available internships you're looking for in JOB4U, as here you will get your desired jobs with different sections. For example, you can search jobs according to your branch in the engineering field.
